Emerald, VIC | Bachelor of Software Engineering (Honours) - Monash University

PROFESSIONAL SUMMARY

I am a Software Engineering (Honours) student at Monash, graduating 2027. I've a solid understanding in data structures, algorithms and software design, testing and more through my degree, plus 3 years translating technical problems for non-technical people at a local council. I would be keen to demonstrate my skills while learning from your expertise.

EDUCATION

Bachelor of Software Engineering (Honours) - Monash University, Clayton

- Expected graduation: 2027

WORK EXPERIENCE

Casual Customer Support Officer - Cardinia Shire Council

Oct 2022 – Present

- Resolve 60+ customer enquiries daily requiring interpretation of Victorian building regulations, planning constraints, and local laws while developing strong skills in breaking down jargon for technical and non-technical stakeholders.
- Coordinate with 20+ internal departments to deliver what residents need to a high standard and within the designated turnaround time for any given enquiry.
- Maintain data accuracy and privacy compliance across multiple enterprise CRM and receipting systems
- Guided customers through regulatory processes, reducing escalation rate and improving first-contact resolution

NOTABLE PROJECTS

ARKHIVE – A Document Digitisation Solution for Businesses

- **Description:** Open-source web app that converts photos of documents, receipts, forms, and tables into structured, exportable data, with LLM powered chat-based validation and refinement of extracted content.
- **Tech Stack:** MERN stack, LLMs (OCR and conversational validation)
- **Key Contributions:**
 1. Led system architecture direction; researching, selecting, and training for the technical stack for a 14-person team.
 2. Designed and implemented the human-in-the-loop validation system, enabling users to refine AI-extracted data through natural chat-based interactions.
 3. The sole architect responsible for CI/CD and testing infrastructure end to end, ensuring reliable builds and deployments across the team.

Goal-Tracking Bot | 13+ daily active users

- **Description:** Bot that lets users log, track, and stay accountable to daily goals.
- **Tech Stack:** Python, SQLite Database, Supabase for daily backups, self-hosted on Raspberry Pi (Debian home lab)

- **Key Contributions:** Designed and built end-to-end; currently serves 13+ daily active users; manage my own hosting infrastructure as well as managing user experience.

Multi-Agent Personal Finance & Fitness Monitor

- **Description:** Multi-agent AI system that monitors personal finances, fitness metrics, and goal progress.
- **Tech Stack:** Python, SQLite Database, Claude API, self-hosted.
- **Key Contributions:** Architected system demonstrating coordinator pattern, context management, agent orchestration and RAGs.

Melbourne Metro Transit Data Pipeline

- **Description:** Self-directed data engineering project ingesting live Melbourne Metro train delay data from PTV/Dept of Transport's GTFS-Realtime protobuf feeds.
- **Tech Stack:** Python, PostgreSQL (star-schema warehouse)
- **Key Contributions:** Designed an append-only grain schema to preserve delay history as a time series; automated ingestion via a scheduled polling loop.

Personal Website with AI Assistant | <https://acyrus.netlify.app/>

- **Description:** Personal portfolio site with an integrated AI chat assistant.
- **Tech Stack:** React, Tailwind CSS, ThreeJS, hosted on Netlify
- **Key Contributions:** Built and deployed the full site and assistant integration end-to-end.

TECHNICAL SKILLS AND AREAS OF KNOWLEDGE

Languages & Frameworks

- Python, JavaScript, Java, MATLAB, SQL, NOSQL (various), Assembly, C++, Swift
- Web frameworks: Vue, React, Tailwind, Vite, Express.js
- Shell scripting

Data & Analytics

- Power BI dashboard design and reporting; turning data into information and knowledge.
- SQL and NoSQL (MongoDB, Cassandra, Neo4j, SQLite3, Postgres)
- Data warehouse design, OLAP, data cleaning

DevOps & Infrastructure

- Git/version control, Docker (dev/staging/prod/CI workflows), CI/CD pipelines
- Linux (Debian/Pi OS), VMware, self-hosted Raspberry Pi home lab

Operating Systems & Computer Networks

- Network configuration
- Linux (Debian/Pi OS)

Other skills

- Microsoft Office, Power BI, SolidWorks, Fusion360
- Enterprise CRM and accounting systems (production environment experience)
- Experience with architecting and configuring agentic AI (LLMs, OCRs amongst others)
- IOS / Apple ecosystem app development

ADDITIONAL SKILLS

- Bilingual: English (native) and Persian (fluent)
 - Strong written and verbal communication skills, demonstrated across technical and non-technical domains
 - Independent worker; self-directed learner with active personal project portfolio
 - Extremely receptive to constructive feedback
-
