Emerald, VIC | Bachelor of Software Engineering (Honours) - Monash University

PROFESSIONAL SUMMARY

*I am seeking to apply for **intern - Data Project Support Officer** role advertised at Department of Transport and Planning.*

*I am a third-year **Software Engineering** student at Monash University with 3 years of professional customer support experience at **Cardinia Shire Council**. I have skills in most **major development paradigms** (including full-stack development), CI/CD, Software quality, data structures and algorithms and much more. If you're looking for someone **with technical knowhow** and **strong communication skills** developed through daily **stakeholder engagement in a major local government** organisation, feel free to reach out to me directly.*

EDUCATION

Bachelor of Software Engineering (Honours) - Monash University, Clayton

- Expected graduation: 2027

WORK EXPERIENCE

Casual Customer Support Officer - Cardinia Shire Council

Oct 2022 – Present

- Resolve 60+ customer enquiries daily requiring interpretation of Victorian building regulations, planning constraints, and local laws while developing strong skills in breaking down jargon for technical and non-technical stakeholders.
- Coordinate with 20+ internal departments to deliver accurate outcomes for residents.
- Maintain data accuracy and privacy compliance across multiple enterprise CRM and receipting systems
- Guided customers through regulatory processes, reducing escalation rate and improving first-contact resolution

TECHNICAL SKILLS AND AREAS OF KNOWLEDGE

Languages & Frameworks

- Python, JavaScript, Java, MATLAB, SQL, NOSQL (various), Assembly, C++ etc.
- Web frameworks: React, Tailwind, Vite, Express.js – frontend and backend
- Shell scripting

Data & Analytics

- Power BI - dashboard design and reporting, turning data into information and knowledge.
- SQL and NoSQL (MongoDB, Cassandra, Neo4j)
- Data warehouse design, OLAP, data cleaning

DevOps & Infrastructure

- Git/version control, Docker (dev/staging/prod/CI workflows), CI/CD pipelines
- Linux (Debian/Pi OS), VMware, self-hosted Raspberry Pi home lab

Operating Systems & Computer Networks

- Network configuration
- Linux (Debian/Pi OS)

Other skills

- Microsoft Office, Power BI, SolidWorks, Fusion360
- Enterprise CRM and accounting systems (production environment experience)
- Experience with architecting and configuring agentic AI (LLMs, OCRs amongst others)

NOTABLE PROJECTS

ARKHIVE – A Document Digitisation Solution for Businesses

- Open-source web-app implemented with MERN stack
- An intelligent OCR (Optical Character Recognition) solution that converts photos of documents, receipts, forms, and tables into structured, exportable data.
- Utilises Large Language Models to let users validate and refine the extracted content through natural, chat-based interactions.
- Coordinating in a 14-person sub team to deliver a fully functional product.

Personal Website with AI Assistant | <https://acyrus.netlify.app/>

- Built and deployed a personal portfolio site with an integrated AI chat assistant using a MERN stack + Claude API

Goal-Tracking Bot | 12+ daily active users

- Designed and built a bot that allows users to log, track, and adhere to daily goals. Currently serves 12+ daily users
- Built with python
- Self-hosted on Raspberry Pi home lab running Debian.

Multi-Agent Personal Finance & Fitness Monitor

- Architected a multi-agent AI system to monitor personal finances, fitness metrics, and goal progress
- Demonstrates coordinator pattern, context management and agent orchestration.

ADDITIONAL SKILLS

- Bilingual: English (native) and Persian (fluent)
- Strong written and verbal communication skills, demonstrated across technical and non-technical domains
- Independent worker; self-directed learner with active personal project portfolio
- Very receptive to constructive feedback
